Ethernet/WiFi Hub

Hub receives the temperature data from the loggers up to 700 meters in range. Connected to the Internet via Ethernet/ Wifi it enables real-time and remote monitoring.
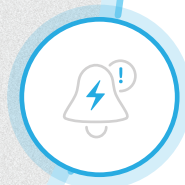

SIMPLE PLUG & PLAY
SOLUTION

RF Communication
Receive the signal within 700 meters in range

Compact Size
Place the hub conveniently in your facility

### Immediate Alerts
Get notified in case of unexpected excursions

Ethernet / Wifi
Hassle-free way to transfer data to any database in the world

COOLDIRECT

Ethernet/WiFi Hub

Communication with loggers
869MHz for Europe / 920.9MHz for USA, Asia, Brasil etc.

Connectivity to the network
Ethernet / Wi-Fi   (800, 850, 900, 1800, 1900MHz)

Communication with database
Bidirectional, using UDP protocol using AES128 encryption

Authentication
128bit key

Radio range
Up to 700 meters in free, open space

Power supply
5V DC Power Adapter

Operating temperature
From -20°C to + 60°C

Housing
ABS

IP
44

Dimensions
180mm x 100mm x 45mm
