

# NFC Loggers

NFC loggers are small, credit-card sized devices that are able to automatically measure various environmental conditions, like temperature and humidity. The data is stored in its memory and can be accessed within less than 2 sec using a bluTag mobile app.

## SMALL SIZE

### Easy-to-Integrate Size

Directly integrate the logger inside any kind of container or pallet. It's small, it's convenient and it's secure

## PRECISE MEASUREMENT

### Be Confident of Measurements

Our Swiss-made sensors have a 0,2°C precision between 0°C and 30°C and 0,4°C between -30°C and +70°C

## NFC TECHNOLOGY

### Access to Data at a Glance

Quickly access data history using any NFC-enabled device (like Android smartphone, iPhone or a dedicated NFC reader)

## LONG AUTONOMY, BIG DATA CAPACITY

### Ensure Safe Operations

Our NFC loggers have different autonomy options and can store up to 5,000 measurements in their-roll-over memory, saving your time

## MANUAL "PUSH" BUTTON

### Start Recording Anytime You Wish

With a convenient "PUSH" button you'll be able to start recording any time you like, giving you more flexibility and control

## SECURITY

### Prevent from Data Stealing or Modification

Thanks to the HTTPS protocol with SSL and AES128 your data is secure

## ALERT DIODES

### On-the-Spot Breach Check

With personalized alert diodes you'll be able to instantly identify if the breach has occurred or not. UTC time helps you to determine the responsible party

## SIMPLE INSTALLATION

### Enjoy Plug & Play Simplicity

With already pre-configured and added to the cloud devices, installation couldn't be easier!

100% Recyclable Packaging
